

The radio station KLOVE FM 90.7 is available in my local community and is an important service for my family, my friends, and myself. I can rely on the fact that KLOVE serves my area with integrity, safe entertainment and news. It is supported by its listeners. I gladly support and will continue to support this radio station.

It would be a significant impact to my community if we were to lose KLOVE for any reason including displacement by an LPFM broadcaster. This radio station is one-of-a-kind and there are very few, if any, alternatives to turn to. It is a family-oriented, "clean", and commercial-free option for the community. I myself have thoroughly enjoyed it over the past 3 years.

KLOVE is the only station in this area that unites people from across the nation with uplifting, positive and non-sexual/non-suggestive, or explicit entertainment. This nation should protect the few stations and listening areas like KLOVE that do not impose undesirable and graphically illicit material on its listeners. There are many people that would like the few radio stations that are available, like KLOVE, to be able to continue in existence.

Thank you for allowing our comments and taking them into consideration.
